

CLOPYRALID	GROUP	4	HERBICIDE
------------	-------	---	-----------

FIFRA Section 24(c) Special Local Need (SLN) Label

Dow AgroSciences LLC

9330 Zionsville Road

Indianapolis, IN 46268-1054 USA

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

Stinger®

EPA Reg. No. 62719-73
EPA SLN No. OR-220001

Expiration Date: This label is valid until December 31, 2027 or until otherwise amended, withdrawn, canceled, or suspended.

**For Control of Broadleaf Weeds and Canada Thistle in Caneberry
(Subgroup 13-07A)¹**

¹ Caneberry (subgroup 13-07A) including blackberry; loganberry; raspberry, red and black; wild raspberry; cultivars, varieties, and/or hybrids of these

Use of Stinger® herbicide on caneberry may result in crop injury, crop yield reduction and/or crop loss. Read and understand the Special Conditions and Risks of Use section on this label before using this product in accordance with this FIFRA Section 24(c) Special Local Need.

Active Ingredient:	% by Weight
clopyralid: 3,6-dichloro-2-pyridinecarboxylic acid, monoethanolamine salt.....	40.9%
Other Ingredients.....	59.1%
Total.....	100.0%

Acid Equivalent: clopyralid: 3,6-dichloro-2-pyridinecarboxylic acid - 31% (3 lb/gal)

Keep Out of Reach of Children
CAUTION

Environmental Hazards

Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. Do not contaminate water used for irrigation or domestic purposes.

Groundwater Advisory

Clopyralid is known to leach through soil into groundwater under certain conditions as a result of label use. This chemical may leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow.

Surface Water Advisory

This product may impact surface water quality due to runoff of rainwater. This is especially true for poorly draining soils and soils with shallow groundwater. This product is classified as having high potential for reaching surface water via runoff for several weeks after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of clopyralid and its degradates from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours.

Non-Target Organism Advisory

This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated site. Protect the forage and habitat of non-target organisms by following label directions intended to minimize spray drift

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This SLN label and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Read this SLN label and the label affixed to the container for Stinger® herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this SLN label and the label affixed to the container for Stinger.

Application Rate: To control broadleaf weeds and Canada thistle, apply 1/3 pint of Stinger® per acre per application (0.125 pound acid equivalent per acre) as a banded application to the soil, extending out a minimum of 3 feet on each side of the plant row. Apply Stinger in a minimum spray volume of 10 gallons per acre. Avoiding contact of spray on foliage (where possible) will reduce the potential for crop injury. For suppression of Canada thistle, apply after the majority of basal leaves have emerged but prior to bud stage and at least 30 days prior to harvest.

Spot Treatment: Hand-held sprayers may be used for spot applications. Refer to the Hand Held Sprayers section of the container label for conversion rates, mixing, and application directions for hand-held sprayers.

Wipe Treatments: For wipe treatments, apply a 2% solution of Stinger in water (2.5 fl oz or 75 mL per gallon). Make a maximum of two applications. The total usage of Stinger from all types of applications cannot exceed 10.6 fl oz per acre or 2/3 pint (0.25 lb ae clopyralid) per acre per annual growing season. Do not permit Stinger to contact desirable foliage or crop injury will result.

Restrictions:

- Do not apply more than a total of 2/3 pint (0.25 pounds acid equivalent per acre) of Stinger per acre per year per crop.
- The minimum retreatment interval is 30 days.
- **Preharvest Interval:** Do not apply within 30 days of harvest.
- Do not make more than two applications per crop per year at the 0.125 pound acid equivalent per acre rate.
- Do not apply by aircraft.
- **Chemigation:** Do not apply this product through any type of irrigation system.
- Do not use plant residues treated with Stinger for composting or mulching where susceptible plants may be grown the following season. Follow the restrictions on the label affixed to the container for Stinger regarding the use of treated plant material or manure from animals that grazed on treated plant material, as compost or animal bedding/feed.

Precautions:

- Stinger is a residual herbicide and applications must be made based upon accurate rate per acre calibrations. Applications of Stinger can injure the caneberry plant and significantly reduce yields depending upon rates used, timing of application, and environmental conditions.

Special Conditions and Risks of Use

USE OF Stinger® herbicide (THE “PRODUCT”) ON CANEBERRY (THE “CROP”) MAY RESULT IN CROP INJURY, CROP YIELD REDUCTION AND/OR CROP LOSS. READ AND UNDERSTAND THESE SPECIAL CONDITIONS AND RISKS OF USE BEFORE USING THE PRODUCT ON THE CROP.

Dow AgroSciences makes the Product available for use in the manner described in this Special Local Need (SLN) on the basis that, in the sole opinion of the user, the benefits and utility derived from the use of the Product on the Crop outweigh the potential risk of Crop injury or loss. The decision to use this Product in the manner described in this SLN Labeling must be made by each individual user on the basis of anticipated benefits versus (i) the risk of Crop injury, Crop yield reduction and Crop loss, (ii) the severity of the target pest infestation, (iii) the cost and availability of alternative pest controls, and (iv) any other relevant factors.

By purchasing the Product for use, or using the Product, in the manner described in this SLN Labeling, you acknowledge and accept that:

- (1) You assume all risk of Crop injury, Crop yield reduction and Crop loss;
- (2) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any representations or recommendations regarding the use of this Product on the Crop other than the statements on this SLN Labeling;
- (3) Dow AgroSciences does not make, and does not authorize any agent or representative to make, any warranties, express or implied, with respect to the use of the Product on the Crop and disclaims all warranties, express or implied, including any implied warranties of fitness for a particular purpose or merchantability;
- (4) Dow AgroSciences disclaims all liability for any damages, losses, expenses, claims or causes of actions arising out of or relating to Crop injury, Crop yield reduction and/or Crop loss;
- (5) These Special Conditions and Risks of Use supersede any contrary representations or recommendations by Dow AgroSciences, its agents or representatives, and any provisions in or on any Product literature or labeling including any provisions on the label affixed to the Product container.

If these Special Conditions and Risks of Use are not acceptable, the unopened Product may be returned to the seller for a refund or used for a different labeled use in accordance with the label affixed to the Product container. These Special Conditions and Risks of Use are required by Dow AgroSciences and not specified by the U.S. EPA or the State of Oregon.
